Audit Scorecard.

Scored against the Storemate Wave Design System brand standards, content guidelines, and technical requirements. Each category is scored independently and weighted to produce the overall score.

AUDIT SUMMARY

The foundation is strong — origin story, real testimonials, and award photography are excellent. Critical issues are limited to legal links and ISO 27001 mislabelling. Most remaining issues are copy changes requiring no development work.

Critical Issues.

These two issues must be fixed before any other work. Both carry reputational and legal risk. Neither requires development work — only copy changes.

CRITICAL

15 min — copy change only

ISO 27001 shown as "Certified" — it is not

1

Current: The stats strip shows "ISO 27001 — Certified". Storemate is pursuing certification, not certified. This is a factual misrepresentation. Enterprise buyers, auditors, and regulators check this.

Fix: Change "Certified" to "In Progress". Suggested copy: "ISO 27001 — In Progress". Full ISO 27001 commitment document now available at storemate.lk/iso27001.

CRITICAL

2-4 hrs — publish PDFs or create pages

All four legal footer links point to "#"

2

Current: Privacy Policy, Terms of Service, Data Security, and ISO 27001 all lead to "#". For a brand whose value 04 is Professional & Secure, this is a visible trust failure. Serious sellers, enterprise buyers, and GCC partners check these links.

Fix: Publish the three documents now generated: Privacy Policy → storemate.lk/privacy, Terms of Service → storemate.lk/terms, ISO 27001 → storemate.lk/iso27001. Update Data Security to link to the ISO 27001 page or a dedicated data page.

High Priority Issues.

These issues directly affect brand trust and conversion. Most are copy changes. None require significant development work.

HIGH

30 min — copy change

Stats strip framing — "Orders managed" and "Sellers worked with"

3

Current: "25M+ Orders managed" and "30,000+ Sellers worked with" imply these are direct Storemate metrics. Both figures come from Curfox operations. This creates a credibility risk if challenged by informed buyers or press.

Fix: Correct to: "Built from 25M orders & 30,000+ Sri Lankan sellers" as the proof strip label. Or use subtext beneath each stat: "25M+" with subtext "From Curfox experience". The CTA section correctly uses "Built from the experience of 25M orders and 30,000+ Sri Lankan sellers" — apply same framing to the stats strip.

HIGH

15 min — copy change

Hero description line does not match the Entrepreneur promise

4

Current: "Online Sellers who think bigger, deserve tools built for what comes next." This is generic SaaS copy. It does not sustain the premium Entrepreneur feeling established by the headline. "Think bigger" is vague. "What comes next" is unclear.

Fix: Replace with one of the approved lifestyle lines. Recommended: "You were never just a seller. Storemate makes that visible." Or: "Your business should fund your life. Not consume it." Or: "Built for Sri Lankan sellers who are ready to live like the Entrepreneurs they are."

HIGH

1-2 days — photography + implementation

No lifestyle hero image — premium feeling not achieved

5

Current: The hero runs on a plain background with no image. The premium Entrepreneur feeling defined in the brand standards requires a lifestyle image showing the sellers dream and aspirational identity.

Fix: Commission or source a professional lifestyle image: confident Sri Lankan entrepreneur, aspirational setting, forward-looking expression. Apply navy overlay at 55-60% opacity. Full creative brief exists in the Wave Design System brand document.

HIGH

10 min — copy change

Footer brand description uses "#1" unsubstantiated claim

6

Current: "Sri Lanka's #1 Seller Order Management System" — "#1" is a superlative with no cited source. Brand voice explicitly prohibits unsubstantiated claims. Undermines the credibility built by the origin story.

Fix: Replace with the brand tagline: "From seller to Entrepreneur." Keep the existing second sentence: "Built from the

Medium Priority Issues.

These issues affect SEO, brand consistency, and long-term trust. Most are single-line copy changes or minor content additions.

8	MEDIUM Page title tag undersells the brand 10 min — meta tag change Current: "Storemate Sri Lanka's Order Management Platform" — describes a feature category. Does not communicate brand position, tagline, or competitive differentiation. Affects SEO and first impression in search results and browser tabs. Fix: Update to: "Storemate — From seller to Entrepreneur." Or: "Storemate The standard for Sri Lankan e-commerce." Leads with brand identity, not feature category.
9	MEDIUM No meta description on the homepage 15 min — meta tag addition Current: No meta description is set. Google generates one automatically from page content — usually pulling from the hero section. This means the brand has no control over what appears in search results. Fix: Add meta description: "Storemate is Sri Lanka's order and inventory management platform for online sellers. Built from the experience of 25M orders and 30,000+ Sri Lankan sellers. Start free for 3 months — no card needed." 155 characters maximum for optimal display.
10	MEDIUM Blog and Careers footer links broken 30 min — remove or create placeholders Current: "Blog" and "Careers" both link to "#". Less critical than legal links but still signals an incomplete platform to informed visitors. Fix: Option A: Build placeholder pages with "Coming soon" messaging. Option B: Remove from footer navigation until pages are ready. Broken links are worse than absent links.
11	MEDIUM Community section has no numbers or proof 1 hr — update with real numbers Current: The three pillars — Educator, Community, Standard — make strong claims but provide no evidence. "Tens of thousands of sellers" and "a growing community" are vague. The brand voice rule is: numbers over adjectives. Fix: Add one specific number per pillar: Educator: "Free course · 16 video lessons · [X] sellers enrolled" Community: "Join [X]+ Sri Lankan sellers sharing knowledge" Standard: "Storemate and Curfox — processing [X] orders monthly"
12	MEDIUM Voice inconsistency — "every single day" 5 min — copy change Current: "5+ hours freed per staff member every single day" — "every single day" is informal and tabloid in tone. Inconsistent with the confident, measured brand voice established throughout the rest of the page. Fix: Change to: "5+ hours saved per staff member — every day." Remove "single". More confident. More consistent with brand voice.
13	MEDIUM Copyright year missing from footer 5 min — copy change Current: "© Parallax Technologies (Pvt) Ltd. All rights reserved." is missing the year. Standard legal practice includes the year. Fix: Update to: "© 2026 Parallax Technologies (Pvt) Ltd. All rights reserved."
14	MEDIUM No Open Graph meta tags for social sharing 1-2 hrs — meta tag implementation Current: When the Storemate URL is shared on Facebook, LinkedIn, or WhatsApp, no preview image or custom description is shown. The platform auto-generates a poor preview. Critical for a brand investing heavily in Facebook marketing. Fix: Add OG tags: og:title, og:description, og:image (use hero image), og:url, og:type. Twitter card tags also recommended. Facebook Sharing Debugger can validate after implementation.

Low Priority Issues.

These are refinements. Address after all higher priority issues are resolved.

- 15

LOW

Courier logos strip has no label

10 min

Current: The courier logo strip shows five logos with no heading. New visitors may not understand the context immediately.

Fix: Add a small label above or below: "Integrated with all major Sri Lankan couriers" — the label already exists in the code but check visual prominence.
- 16

LOW

Mobile app section — "Free for all Storemate subscribers" is limiting

10 min — verify and update

Current: "Free for all Storemate subscribers" implies the app is not available to free version users. If the app is available on the free tier, clarify.

Fix: Update to reflect actual access: "Available on all plans including Free" or "Free to download for all Storemate users".
- 17

LOW

CTA section proof line is strong but placement is late

30 min — consistency audit

Current: "Built from the experience of 25M orders and 30,000+ Sri Lankan sellers." appears correctly in the CTA section. However this same corrected framing is not yet applied to the stats strip above the fold.

Fix: Ensure consistent framing of the 25M/30,000 figures across all instances on the page. Audit every occurrence and apply the same honest framing.
- 18

LOW

Seller story section — result stat could be stronger

30 min — design update

Current: "10x faster order processing" is the result shown for the Nishanta Kumra story. This is a strong result but shown in a small badge. More impact available.

Fix: Give the result more visual weight. Consider showing the before/after numbers directly: "From 40 orders/week to 400+. Same team. First month."
- 19

LOW

FAQ section referenced in nav but not fully visible in audit

1 hr — content review

Current: Navigation links to `index.html#faq` but the FAQ section was not prominently visible in the content audit. Verify it is complete and accessible.

Fix: Review the FAQ section content for brand voice consistency. Ensure all questions use plain language and answers are specific.
- 20

LOW

No schema markup for organisation or breadcrumbs

2 hrs — technical SEO

Current: No structured data markup detected. Schema.org Organisation markup would strengthen Google Knowledge Panel and search appearance.

Fix: Add Schema.org Organisation markup with name, URL, logo, social profiles, and contact information. LocalBusiness schema also applicable.

What is Working Well.

These elements are on-brand and effective. Do not change them.

- "From seller to Entrepreneur." — hero headline is correct and powerful
- "The Standard for Sri Lankan E-Commerce" — eyebrow is correct
- "You are in the right place." — arrival line is correct and unique
- "Free to start · Full setup by our team · No card needed" — reassurance line is correct

4-Week Action Plan.

Ordered by impact and effort. Week 1 requires no development — copy and link changes only. Week 2 is copy changes. Week 3 requires design. Week 4 is technical SEO.

WEEK 1

Critical & Legal — No development required

Target score after this week: 7.8 / 10

Fix ISO 27001 label

Change "Certified" to "In Progress" in stats strip

15 min

Publish Privacy Policy

Upload PDF or create page at storemate.lk/privacy

2 hrs

Publish Terms of Service

Upload PDF or create page at storemate.lk/terms

1 hr

Publish ISO 27001 page

Upload PDF or create page at storemate.lk/iso27001

1 hr

Fix social links

Connect to real profiles or remove icons entirely

30 min

Fix Blog/Careers links

Remove from footer or create placeholder pages

30 min

Add copyright year

Change to "© 2026 Parallax Technologies"

5 min

WEEK 2

High Priority Copy — No development required

Target score after this week: 8.4 / 10

Fix stats strip framing

Change to "Built from 25M orders & 30,000+ Sri Lankan sellers"

30 min

Replace hero description

"You were never just a seller. Storemate makes that visible."

15 min

Remove "#1" footer claim

Replace with brand tagline: "From seller to Entrepreneur."

10 min

Update page title tag

"Storemate — From seller to Entrepreneur."

10 min

Add meta description

155-character brand-voice description

15 min

Fix voice inconsistency

Change "every single day" to "every day"

5 min

Add community numbers

One specific number per community pillar

1 hr

WEEK 3

Design & Image — Requires design work

Target score after this week: 9.0 / 10

Source hero lifestyle image

Sri Lankan entrepreneur — brief in Wave brand document

1-2 days

Implement hero image

Navy overlay 55-60% · Staggered animation sequence

4 hrs dev

Improve seller story result

"From 40 to 400+ orders. Same team. First month."

1 hr

Strengthen community section

Add proof images or real community screenshots

2 hrs

Add Data Security page

Link footer "Data Security" to ISO 27001 or dedicated page

2 hrs

Audit summary at a glance.

Issue summary.

CRITICAL	2	ISO 27001 mislabelled · All legal links broken
HIGH	5	Stats framing · Hero description · No hero image · "#1" claim · Broken social links
MEDIUM	7	Title tag · Meta description · Blog/Careers · Community numbers · Voice · Copyright · OG tags
LOW	6	Courier label · App copy · Stats consistency · Seller result · FAQ · Schema markup

TOTAL ESTIMATED EFFORT TO REACH 9.2 / 10		
Week 1 — Critical + Legal:	4-6 hours total	No developer needed
Week 2 — High priority copy:	3-4 hours total	No developer needed
Week 3 — Design + Image:	1-2 days	Designer + frontend developer
Week 4 — Technical SEO:	1 day	Frontend developer

AUDIT VERDICT
The foundation is strong. The fixes are mostly copy. The target is reachable.
Two weeks of focused work on copy and links alone will take this site from 6.8 to 8.4.
The hero image and technical SEO take it to 9.2 — the target for a premium brand at this level.
